Professional Summary

Senior Fullstack Developer with 7 years of experience in building scalable, high-performance web and mobile applications. Proven expertise in Laravel, React Native, Node.js, and cloud-based solutions. Experienced in leading projects from concept to deployment, collaborating with global teams, and delivering innovative systems including live streaming platforms, logistics management systems, and e-learning platforms. Strong advocate for clean code, performance optimization, and remote collaboration with open-source contributions on GitHub.

Technical Skills

Backend:	Laravel, PHP, Node.js, Python
Frontend:	React, React Native (Expo), Next.js, TailwindCSS, Bootstrap
Databases:	MySQL, PostgreSQL, MongoDB
DevOps / Cloud:	Docker, AWS, GitHub Actions, CI/CD
Others:	REST APIs, Web Scraping, Real-time Systems, Agile/Scrum, Payment Integrations

Professional Experience

Fullstack Developer — Freelance (May 2018 – Present)

- Built and maintained scalable web applications using Laravel and modern web stacks.
- Developed real-time streaming platforms serving hundreds of concurrent users.
- Optimized databases improving performance by 30% faster response times.
- Integrated payment gateways, notifications, and third-party APIs for seamless operations.
- Collaborated remotely with international clients to deliver high-quality custom solutions.
- Led a small team of developers in Agile sprints to deliver projects efficiently.
- Managed GitHub repositories with CI/CD workflows and comprehensive documentation.

Highlighted Projects

Laravel Live Streaming App

- Backend REST API for IPTV management and live streaming control with advanced role-based access.
- Scalable architecture handling thousands of concurrent streams.

React Native Voice Room App

- Real-time voice chat platform supporting multiple rooms and user roles.
- Low-latency communication achieved through optimized socket connections.

Car Wash System

- A complete booking and management solution for car wash businesses.
- Integrated online payments, notifications, and appointment scheduling.

Laravel Logistics Backend

- System for order management, shipment tracking, and inventory control.
- Provided advanced reporting and analytics for logistics efficiency.

SmartLearn E-learning Platform

- Interactive e-learning system with video courses, quizzes, and progress tracking.
- Built to support thousands of students with personalized learning paths.

Trading Bot AI

- Forex analysis bot using OpenAI API and Twelve Data API.
- Generates real-time buy/sell signals with dynamic stop-loss and take-profit levels.

Additional Experience

- Delivered custom WordPress themes and plugins optimized for performance and SEO.
- Built small-scale mobile apps with React Native for startups.
- Mentored junior developers in Laravel and React best practices.
- Contributed to open-source projects and technical documentation on GitHub.

Education & Certifications

- High School Diploma — 2019
- Fullstack Web Development Certificate — Soft, 2019
- Advanced PHP & Laravel Certification — Udemy, 2022
- React Native Mastery Certification — Coursera, 2023
- Docker & AWS Cloud Essentials — Pluralsight, 2024
